CAREER OBJECTIVE

Aspiring Software Engineer with hands-on experience in full-stack development, machine learning and cloud technologies. Seeking to leverage technical expertise in Python, JavaScript and AI/ML to contribute to innovative software solutions in a dynamic technology organization.

EDUCATION

Bachelor of Technology - Computer Science Engineering

SRM Institute of Science and Technology, Chennai | 3rd Year | Expected May 2027

Higher Secondary Education | 2021-2023

Hiranandani Foundation School, Thane | General Proficiency Award Recipient

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Java, C#, TypeScript

Cloud/DevOps: AWS, Microsoft Azure, Docker, Kubernetes

Tools: Git, GitHub, Postman, Linux, VS Code, Figma **Backend:** NodeJS, ExpressJS, MongoDB, PostgreSQL, Firebase **Frontend:** ReactJS, NextJS, React Native, HTML5, CSS3, Bootstrap, Redux

AI/ML: Machine Learning, Deep Learning, Reinforcement Learning, Neural Networks

PROJECTS

Net.AI - Network Security & Performance Optimization

February, 2025

- Developed a real-time machine learning model for network traffic analysis and threat detection
- Implemented algorithms to identify network anomalies and optimize performance
- Tech Stack:** Python, Machine Learning, Network Security, Data Analysis

LunarLand - Deep Reinforcement Learning Agent

January, 2025

- Created an AI agent using deep reinforcement learning for lunar landing simulation in Atari 2600 environment
- Optimized landing precision through advanced control systems and Q-learning algorithms
- Tech Stack:** Python, TensorFlow, Reinforcement Learning, OpenAI Gym

Water.DRIE - Predictive Water Level Analysis

December, 2024

- Built a time series forecasting model to predict water body levels and drought conditions
- Implemented data visualization dashboard for real-time monitoring and alerts
- Tech Stack:** Python, Time Series Analysis, Machine Learning, Data Visualization

BioPellet Plant Website

October, 2024

- Contributed to full-stack web development for a bio-pellet manufacturing plant
- Enhanced user experience through seamless content integration and responsive design
- Tech Stack:** ReactJS, NodeJS, JavaScript, HTML/CSS

PROFESSIONAL EXPERIENCE

Software Engineering Virtual Intern | Electronic Arts (EA) | January 2025

- Proposed and documented new EA Sports College Football feature with stakeholder communication
- Designed comprehensive class diagrams and implemented C++ header files using OOP principles
- Optimized existing codebase with improved data structures, enhancing system performance
- Prepared technical specifications and feature proposals for cross-functional teams

SUKH SAGAR INDUSTRIES | SDE Intern | Remote

- Designed and developed scalable software solutions to streamline internal workflows and improve process efficiency.
- Implemented core application features using Python, JavaScript, and SQL, reducing manual operations by 30%.
- Collaborated with cross-functional teams to gather requirements and translate them into functional modules.
- Optimized existing codebase and improved system performance, cutting response time by 20%

ACHIEVEMENTS & CERTIFICATIONS

- **Smart India Hackathon 2023** - Qualified for national-level competition
- **General Proficiency Award** - Hiranandani Foundation School, Thane
- **OCI AI Foundations (Associate), OCI Generative AI (Professional), Oracle AI Vector Search (Professional)** – Oracle
- **EA Software Engineering Virtual Experience** - Completed comprehensive software development program • **15+ Projects** - Available on GitHub showcasing web development, ML and system design

ADDITIONAL SKILLS

Languages: English (Fluent), Hindi (Native), Marathi (Native), German, Japanese

Areas of Interest: Artificial Intelligence, Machine Learning, Full-Stack Development, Cloud Computing, Cybersecurity
